GH Flora Kleen														5 ml	

All measurements to be added to 1 gallon of water. IF using Tap Water make sure PPM level is between 280-350ppm

Maintain pH between 5.7 – 6.5 and Water temps between 60-75 degrees before adding Nutrients to the water source.

Water Temps should be between 60-75 degrees and pH should be 5.7-6.5 after nutrients has been mixed one at a time into water. Make sure to mix nutrients really good. Always Strip water of Chlornie and Chloramine before adding nutrients for best results.

(Main base nutrient)

(Main Additives)

(150-280ppm CaMg+ w/RO)

5 ml = 1 teaspoon

Feed flush mix for 3 days in Hydro System, or for 3 feeds in soil grows. Then feed with plain 6 pH water for the rest of leaching process.

Foliar Spray Recipe
